What do teachers and students say about the LCCI English for Business qualifications?

FBS Language Training has been entering students for LCCI Business English examinations for many years. Both staff and students like the fact that they are eminently practical and give students the ability to be fully operative in English. For the last four years we have based a Master of Business Languages degree around the English for Business examinations and the course has been a great success. We can fully recommend the whole examination suite.”

Graham Sanders,
Fundesem Business School,
Alicante - Spain

This exam offers you the chance to apply all the English you’ve learned over the years to situations and tasks you really will have to tackle in your working life. It also shows future employers that you really can work in English.”

Oihane León Añón,
Student and successful EfB candidate from CESUGA,
A Coruña – Spain

LCCI English for Business qualifications

Designed for students who want to develop their practical English language skills for use in everyday business settings. This scenario-based test is offered at **five levels** - catering to students preparing for work, in vocational training or on business courses.

What each level covers

Preliminary CEF A1-A2	data, facts and instructions	place of work descriptions	jobs and roles in a work context		
Level 1 CEF A2-B1	business letters or memos	reading comprehension	business information processing		
Level 2 CEF B1-B2	writing using standard business formats	conversations about business related topics	understanding leaflets, reports, articles and company notices		
Level 3 CEF B2-C1	producing a range of documents in various business formats	participating in conversations and discussions	making a business presentation	drafting an internal company report	converting and reformulating text and data
Level 4 CEF C1-C2	writing in a range of styles within a variety of business contexts	describing complex situations and presenting on a range of topics	understanding authentic texts	producing related business writing	Reformulating texts into various formats – specifically text to digital/graphical/numerical formats

Mapped to coursebooks such as Market Leader from Pearson, but adapts perfectly to all good Business English course materials.

A better job, a better life
